Remarks

Note: Remarks are not for responding to an office action.

Applicant advises the Examiner that the parent of the subject application, namely U.S. Patent No. 6,374,695, has been involved in a patent litigation. During the course of the litigation, numerous prior art references were uncovered relating to fixed pedal assemblies, adjustable pedal assemblies, and electrical generators. The subject electronic IDS sets forth all of the U.S. patents uncovered during the litigation. It is respectfully requested that each of these U.S. patents be considered and become part of the record of the subject application. Applicant submits that many of these references are irrelevant and/or cumulative. A paper IDS is also being submitted, under separate cover, listing each of the foreign patents and publications as well as non-patent literature. A further explanation of many of the references as well as a listing of the most relevant references is set forth in the paper IDS.
